Projects

Treact

HTML, CSS, JavaScript

[Website Link](#)

- Designed and developed a responsive website utilizing HTML and CSS, ensuring optimal user experience across various devices and screen sizes. Minimal JavaScript is used as well.
- Created an aesthetically pleasing and cohesive design, incorporating brand elements and imagery to display the client's message effectively and maintain brand consistency.

Country Lookup

HTML, CSS, JavaScript, ReactJS

[Website Link](#)

- Developed a responsive web application using ReactJS, HTML, CSS, and JavaScript, enabling users to search for countries and display corresponding information cards dynamically.
- Implemented efficient state management through React.js' state and props to maintain a clean and maintainable codebase, adhering to best practices for great application design and development.
- Leveraged API calls within the React application to fetch country data, enabling a seamless integration of information into the application.

Check E-Portfolio at xquiyo.github.io/QV-Eportfolio for more info and personal projects.
